

## DEPARTMENT OF COGNITIVE SCIENCE

### CAREER POSSIBILITIES

The cross-disciplinary preparation of cognitive science gives students a good grounding for a variety of possible careers. A BA in cognitive science will allow you to apply for jobs in any of the fields that are part of cognitive science. For example, you can apply for jobs in both psychology and computer science.

A BA in cognitive science will also allow you to apply to a variety of different graduate and professional programs. For example, you might decide your interest within cognitive science is cognitive neuroscience and go on to medical school, or language, and go on to do a Masters in Speech and Language Pathology, or simulation and imitation and go on to acting, or mind and media and go on to any number of professions. A BA in cognitive science is good for pre-medicine, pre-law, and pre-management students.

Employers will be pleased to see that your training is broader than that of other candidates. A degree in cognitive science says something about you: "I know about human higher-order cognition and behavior. I have multiple interests and skills in this area and can think about problems in a variety of ways. I've been exposed to many different things, and have a substantial knowledge base." Our majors go on to jobs in the computer science industry, research, marketing, education, and many other fields.

To learn more about the employment value of a degree in Cognitive Science, visit <http://www.case.edu/artsci/cogs/careerpossibilities.html>

### COURSES FOR SPRING 2016

COGS 102: Intro to Cognitive Neuroscience. Turner. MW 12:30-1:45pm. Nord 410.

COGS 202: Human Cognition Viewed from a Cultural Perspective. Deal. MW 3-4:15pm. Nord 204.

COGS 205: Cognition and Design. Oakley. TR 1:15-2:30pm. Crawford 618.

COGS 307. Theory of Cognitive Linguistics, II. Oakley. T 2:45-5:15pm. 618 Crawford. \*\*\*\*\*COUNTS AS A SAGES DEPARTMENTAL SEMINAR\*\*\*\*\*

COGS 309: Advanced Research Workshop II. Tobin. TR 2:45-5:15. Crawford 618.

COGS 311. Mind and Media. Turner. M 5:30-8pm. 618 Crawford. \*\*\*\*\*COUNTS AS A SAGES DEPARTMENTAL SEMINAR\*\*\*\*\*

COGS/WLIT 391: Introduction to Text Semiotics. Berindeanu. MW 2-3:15. Crawford 618.

To learn more about Cognitive Science course offerings, visit <http://case.edu/artsci/cogs/courses.html>

### RESEARCH OPPORTUNITIES

Get involved in research! There are lots of opportunities for undergraduates to do hands-on research with Cognitive Science faculty. For example:

The Language and Cognition Lab: Study the relationship between language, communication, and thought.

The Distributed Little Red Hen Lab: Study multimodal communication and media.

The CWRU Cognitive Phonetics Lab: Study language perception and production.

Learn more about our faculty and their research at <http://www.case.edu/artsci/cogs/faculty.html>.

### COGNITIVE SCIENCE STUDENT ORGANIZATION

Cognitive science students have an active social and academic organization: <http://cognitivescience.case.edu/csso/>

## COGNITIVE SCIENCE DEPARTMENT OPEN HOUSE

Learn more about cognitive science at CWRU at our Department Open House!

**Held OCTOBER 30, 10-12:30pm in the Cognitive Science Lounge (Crawford Hall, 6th Floor).**

**FOOD! BEVERAGES! LAB TOURS! MEET THE FACULTY! MEET LIKE-MINDED STUDENTS!**

## DEPARTMENT OF COGNITIVE SCIENCE

### B.A. in Cognitive Science

Cognitive science brings the insights and methods of natural science, social science, and some of the humanities to the study of the mind. Cognitive science programs have emerged in recent years in response to a call for an integrated approach that does not restrict the study of the mind to a single discipline. Most programs are interdisciplinary and centered on psychology, neuroscience, linguistics, and/or computing. Our department's work is grounded in the fundamental cognitive sciences of neurobiology, neuroscience, psychology, biology, and anthropology, but is unique in its special focus on human creativity and invention, particularly art and technology—the systems invented by human beings to guide their thought and action both individually and culturally.

The undergraduate major requires a minimum of 30 semester hours in cognitive science and approved related coursework: 15 credit hours in the foundation component and 15 hours of elective coursework. Please see our website for information about the minor in cognitive science.

#### THE FOUNDATION COMPONENT

All majors must successfully complete the following core courses:

COGS 101	Introduction to Cognitive Science I
COGS 102	Introduction to Cognitive Neuroscience
COGS 201	Human Cognition in Evolution and Development
COGS 202	Human Cognition from a Cultural Perspective
PSCL 282	Quantitative Methods in Psychology or equivalent, particularly ANTH 319 or STAT 201

#### ELECTIVES

All majors must successfully complete five elective courses. EXAMPLES of acceptable electives are listed below. MANY other courses can qualify, subject to departmental approval. At least three of these courses must be at the 200 or 300 level. Some of these courses have additional prerequisites that may not count towards the requirements of the major. While students may enroll in up to 6 credits of independent study in Cognitive Science (COGS 397), only 3 of these credits may count toward the elective component of the major.

ANTH 102	Being Human
ANTH 103	Introduction to Human Evolution
ANTH 220	Language, Culture, and Communication
ANTH 367	Topics in Evolutionary Biology
ANTH 371	Culture, Behavior, and Person
BIOL 225	Evolution
BIOL 302	Human Learning and the Brain
COGS 206	Theory of Cognitive Linguistics, I
COGS 307	Theory of Cognitive Linguistics, II
COGS 304	Conceptual Integration
COGS 311	Mind & Media
COGS 316	Decision-Making
COGS 317	Cognitive Diversity
COGS 327	Gesture in Cognition and Communication
COGS 328	Cognition and Visual Aesthetic Experience
COGS 329	Cognitive Approaches to Theatre and Dance
COGS 365	Topics in Social Neuroscience
COSI 228	Introduction to Mass Communication
COSI 313	Language Development

ENGL 301	Linguistic Analysis
ENGL 379	Topics in Language Studies
PHIL 203	Natural Philosophy
PHIL 306	Mathematical Logic and Model Theory
PHIL 365	Philosophy of Mind
PSCL 355	Sensation and Perception
PSCL 357	Cognitive Psychology
PSCL 370	Human Intelligence

#### CORE COURSES

COGS 101 Introduction to Cognitive Science, 3 credits - Fall  
A survey of major theories and facts about human cognition, along with an introduction to the kinds of methodologies available to modern cognitive science.

COGS 102 Introduction to Cognitive Neuroscience, 3 credits - Spring  
A survey of the fundamental methods, findings, and theories that attempt to understand the human mind from a neuroscientific standpoint, covering the brain processes underlying such psychological phenomena as consciousness, thought, language, and voluntary action. The approach of this course is cross-disciplinary, including theories and data from clinical and experimental neuropsychology, brain imaging, neuro-electric and neuro-magnetic brain activity, and behavioral neuroscience, among others.

COGS 201 Human Cognition in Evolution and Development, 3 credits - Fall.  
A survey of the unfolding of cognition over time, both the extended time of evolution (across many generations) and the much shorter time of personal development (measured within a single lifetimes). The approach of the course is cross-disciplinary, including approaches that come from complexity theory, biology, anthropology, philosophy, computing science, primatology, and comparative linguistics, among others.

COGS 202 Human Cognition from a Cultural Perspective, 3 credits - Spring  
A survey of the fundamental methods, findings, and theories that attempt to understand the growth and evolution of cognition from a social science or humanistic standpoint. Theories of human cultural evolution and change, of the relationship between the cognizing individual and larger social-cognitive structures, and of such phenomena as distributed networks, cooperative mental work, and the phenomenology of human experience.

Cognitive Science is a department of the Case Western Reserve University College of Arts and Sciences.
