Architecture • Design • Culture

Wellington, New Zealand

Every city is uniquely inventive when it comes to Problem Solving, based on its history, culture, geography and native materials. Since Problem Solving is at the core of Architecture and Design, studying different cultures exposes students to new ways to solve problems.

This intensive Wellington, NZ summer course immerses students into a culture that has a sophisticated appreciation for design based on inventive conceptualization traditions. The program introduces students to critical inquiry through the shared principles and theories of Art, Architecture and Design as experienced in New Zealand’s cultural capital. Using the city as our classroom, students will visit well-known sites, museums and monuments as well as hidden gems that reinforce the material presented in readings, lectures and reviewed in class discussions. This program partners with Massey University’s art and design program.

At the graduate level, each student will explore a neighborhood of his/her choice. This study will conclude with a student-led tour and a final paper.

While no art or drawing skills are required, participants at every level will learn how to improve their visual skills through sketching, observation studies and analyses. Each week students will complete a design project, each exploring a different aspect of the culture. The course offers Global and Cultural Diversity credit and is open to undergraduate and graduate students. There is no language requirement.

Summer Semester
July 2 - 22, 2018

Department of Art Studios
Arts 305: 3-credits

Faculty Advisor:
Sally L. Levine
(sll14@case.edu)

Program Cost:
$2900*

*Does not include:
Flights, Some Meals,
Tuition, Passport
and Visa Fees

Registration deadline: 1 February 2018

Details are being finalized
