MAJORING IN ANTHROPOLOGY
An anthropology undergraduate major provides a unique perspective on human behavior, institutions, and biology. It also provides qualitative and quantitative analytic skills that are an excellent preparation for careers in a wide range of settings including health, international affairs, public service, education, law, management, and industry. Similarly, an anthropology undergraduate major offers preparation for graduate studies in academic programs and in professional schools such as medicine and law.

The Department of Anthropology has a national and international reputation in several areas. For example, the department is known as a center for the study of medical anthropology, cross-cultural aging, psychological anthropology, high altitude adaptation, and childhood studies. Students are encouraged to take advantage of the skills and expertise of the faculty by attending lecture series and seminars, enrolling in independent study courses, and participating in the Honors and Integrated Graduate Studies Programs.

MAJOR REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE
A student may choose among four concentrations for the major: general anthropology, medical anthropology, archaeology, and physical anthropology. Each major requires 30 hours of course work.

GENERAL ANTHROPOLOGY CONCENTRATION
The general anthropology concentration offers training in the subdisciplines of anthropology: sociocultural, physical, and archaeology. The sociocultural anthropology subdiscipline encompasses the study of the interrelationships among socioeconomic institutions, ecology, health and medicine, religion and symbolism, psychology and language. The physical anthropology subdiscipline studies human biological variation in both time and space, applying techniques of human biology, paleontology, genetics, ecology, comparative anatomy, and epidemiology. The archaeology subdiscipline deals with the long sequences of independent sociocultural, technological, and ecological evolution that have taken place under diverse conditions.

The general anthropology concentration provides a broad and integrated perspective on human behavior, socio-cultural diversity, and human evolution together with qualitative and quantitative analytic skills that are an excellent preparation for careers in a wide range of settings including health, international affairs, public service, education, law, management, and industry. At the same time, the general anthropology concentration is excellent preparation for graduate studies in anthropology and in professional schools such as medicine and law.

Required Core Courses
- ANTH 102: Being Human: An Introduction to Social and Cultural Anthropology
- ANTH 103: Introduction to Human Evolution
- ANTH 319 (or equivalent): Introduction to Statistical Analysis in the Social Sciences

At least one course dealing with a geographic area, such as
- ANTH 312: Ethnography of Southeast Asia
- ANTH 314: Cultures of the United States
- ANTH 331: The Most Ancient Near East
- ANTH 333: Roots of Ancient India: Archaeology of South Asia
- ANTH 349: Cultures of Latin America
- ANTH 353: Chinese Culture and Society

Approved anthropology electives: 18 semester hours

MEDICAL ANTHROPOLOGY CONCENTRATION
The undergraduate medical anthropology concentration focuses on understanding health issues cross-culturally. It provides students with the basic foundational knowledge of anthropology and then trains them to investigate, analyze, and communicate information about how socio-cultural, biological, cognitive, economic and techno-environmental factors determine patterns of disease, medical behavior and the organization of and access to health care services.
Required Core Courses
- ANTH 102: Being Human: An Introduction to Social and Cultural Anthropology
- ANTH 103: Introduction to Human Evolution
- ANTH 215: Health, Culture, and Disease: An Introduction to Medical Anthropology
- ANTH 319 (or equivalent): Introduction to Statistical Analysis in the Social Sciences

At least one course dealing with a geographic area, such as
- ANTH 312: Ethnography of Southeast Asia
- ANTH 314: Cultures of the United States
- ANTH 331: The Most Ancient Near East
- ANTH 333: Roots of Ancient India: Archaeology of South Asia
- ANTH 349: Cultures of Latin America
- ANTH 353: Chinese Culture and Society

At least three courses dealing with health-related topics, such as
- ANTH 302: Darwinian Medicine
- ANTH 306: The Anthropology of Childhood and the Family
- ANTH 316: Current Global Health Events
- ANTH 323: AIDS: Epidemiology, Biology, and Culture
- ANTH 326: Power, Illness and Inequality: The Political Economy of Health
- ANTH 328: Medical Anthropology and Public Health
- ANTH 335: Illegal Drugs and Society
- ANTH 337: Comparative Medical Systems
- ANTH 338: Maternal Health: Anthropological Perspectives on Reproductive Practices and Health Policy
- ANTH 350: Culture, Science and Identity
- ANTH 359: Introduction to Global Health
- ANTH 360: Global Politics of Fertility, Family Planning and Population Control
- ANTH 361: Urban Health
- ANTH 365: Gender and Sex Differences: Cross-cultural Perspective
- ANTH 366: Population Change: Problems and Solutions
- ANTH 371: Culture, Behavior, & Person: Psychological Anthropology
- ANTH 376: Topics in the Anthropology of Health and Medicine
- ANTH 378: Reproductive Health: An Evolutionary Perspective

Approved anthropology electives: 6 semester hours

ARCHAEOLOGY CONCENTRATION
The archaeology concentration reconstructs the customs and daily life of people who lived in the past by excavating and analyzing the material remains of the sites of human occupation. At the same time, archaeology seeks to understand the evolution of culture and society by determining how and why changes in human society occurred over the past five million years that our species has inhabited the earth.

The archaeology concentration provides training in both of these endeavors. Building on an excellent overview of general anthropology, it provides in-depth exposure to all subfields of archaeology and an opportunity for more advanced study in old and new world prehistory. The program combines the strength of Case’s Department of Anthropology with the staff and resources of the Cleveland Museum of Natural History’s Department of Archaeology, providing students a unique opportunity to study archaeology and participate in original archaeological research and museum curation.

Required Core Courses
- ANTH 102: Being Human: An Introduction to Social and Cultural Anthropology
- ANTH 103: Introduction to Human Evolution
- ANTH 107: Archaeology: An Introduction
- ANTH 319 (or equivalent): Introduction to Statistical Analysis in the Social Sciences

At least one course dealing with a geographic area, such as
- ANTH 312: Ethnography of Southeast Asia
Three approved archaeology courses, such as
- ANTH 202: Archaeology of Eastern North America
- ANTH 321: Methods in Archaeology
- ANTH 324: Field Methods in Archaeology
- ANTH 331: The Most Ancient Near East
- ANTH 333: Roots of Ancient India: the Archaeology of South Asia
- ANTH 399: Independent Study (if approved by advisor)

Summer fieldwork

Two Approved Electives: 6 semester hours

PHYSICAL ANTHROPOLOGY CONCENTRATION

Physical anthropology deals with the biological nature of humans past and present, looking beyond purely biological phenomena to understand the interactions between biology, behavior, and environment. The subdiscipline of paleoanthropology documents the biological history of humans and analyzes those relationships for past humans in conjunction with archaeology. The subdiscipline of human biology studies physiology, genetics, nutrition, and epidemiology in modern human populations throughout the world in order to understand the relationships between biology, behavior, and environment.

This concentration provides students with the background and skills for further graduate study in anthropology and for professional study in the medical sciences. It also provides students with many other transferable skills including a biocultural perspective on human biology and culture, and the ability to analyze data, interpret findings, and communicate them effectively.

Undergraduate students have the opportunity to conduct independent projects at other institutions including the Cleveland Museum of Natural History and Cleveland Metroparks Zoo.

Required Core Courses
- ANTH 102: Being Human: An introduction to Social and Cultural Anthropology
- ANTH 103: Introduction to Human Evolution
- ANTH 319 (or equivalent): Introduction to Statistical Analysis in Social Sciences

At least one course dealing with a geographic area, such as
- ANTH 312: Ethnography of Southeast Asia
- ANTH 314: Cultures of the United States
- ANTH 331: The Most Ancient Near East
- ANTH 333: Roots of Ancient India: Archaeology of South Asia
- ANTH 349: Cultures of Latin America
- ANTH 353: Chinese Culture and Society

At least three courses dealing with physical anthropology, such as
- ANTH 302: Darwinian Medicine
- ANTH 323: AIDS: Epidemiology, Biology, and Culture
- ANTH 367: Topics in Evolutionary Biology
- ANTH 370: Field Seminar in Paleoanthropology
- ANTH/ANAT 375: Human Evolution: The Fossil Evidence
- ANTH/ANAT 377: Human Osteology
- ANTH 378: Reproductive Health: An Evolutionary Perspective
- ANTH 396: Undergraduate Research in Evolutionary Biology

Approved anthropology electives: 9 semester hours
MINOR REQUIREMENTS
The department offers four minor emphases in anthropology: general anthropology, medical anthropology, archaeology, and physical anthropology. All require a minimum of 15 semester hours in anthropology.

GENERAL ANTHROPOLOGY MINOR
Required Core Courses
ANTH 102: Being Human: An Introduction to Social and Cultural Anthropology
ANTH 103: Introduction to Human Evolution

At least one course dealing with a geographic area, such as
ANTH 312: Ethnography of Southeast Asia
ANTH 314: Cultures of the United States
ANTH 331: The Most Ancient Near East
ANTH 333: Roots of Ancient India: Archaeology of South Asia
ANTH 349: Cultures of Latin America
ANTH 353: Chinese Culture and Society

Two approved electives: 6 semester hours

MEDICAL ANTHROPOLOGY MINOR
Required Core Courses
ANTH 102: Being Human: An Introduction to Social and Cultural Anthropology
ANTH 103: Introduction to Human Evolution
ANTH 215: Health, Culture, and Disease: An Introduction to Medical Anthropology

At least one course dealing with a geographic area, such as
ANTH 312: Ethnography of Southeast Asia
ANTH 314: Cultures of the United States
ANTH 331: The Most Ancient Near East
ANTH 353: Chinese Culture and Society

At least one elective dealing with health-related topics, such as
ANTH 302: Darwinian Medicine
ANTH 306: The Anthropology of Childhood and the Family
ANTH 316: Current Global Health Events
ANTH 323: AIDS: Epidemiology, Biology, and Culture
ANTH 326: Power, Illness and Inequality: The Political Economy of Health
ANTH 335: Illegal Drugs and Society
ANTH 337: Comparative Medical Systems
ANTH 338: Maternal Health: Anthropological Perspectives on Reproductive Practices and Health Policy
ANTH 359: Introduction to Global Health
ANTH 361: Urban Health
ANTH 365: Gender and Sex Differences: Cross-cultural Perspective
ANTH 371: Culture, Behavior, & Person: Psychological Anthropology
ANTH 376: Topics in the Anthropology of Health and Medicine

ARCHAEOLOGY MINOR
Required Core Courses
ANTH 102: Being Human: An Introduction to Social and Cultural Anthropology
ANTH 103: Introduction to Human Evolution
ANTH 107: Archaeology: An Introduction

At least one course dealing with a geographic area, such as
ANTH 202: Archaeology of Eastern Nor
ANTH 312: Ethnography of Southeast Asia
ANTH 314: Cultures of the United States
ANTH 331: The Most Ancient Near East
ANTH 353: Chinese Culture and Society

Three approved archaeology courses, such as
ANTH 202: Archaeology of Eastern North America
ANTH 321: Methods in Archaeology
ANTH 324: Field Methods in Archaeology
ANTH 331: The Most Ancient Near East
ANTH 333: Roots of Ancient India: the Archaeology of South Asia
ANTH 399: Independent Study (if approved by advisor)
Summer fieldwork

PHYSICAL ANTHROPOLOGY MINOR
Required Core Courses
ANTH 102: Being Human: An Introduction to Social and Cultural Anthropology
ANTH 103: Introduction to Human Evolution

At least one course dealing with a geographic area, such as
ANTH 312: Ethnography of Southeast Asia
ANTH 314: Cultures of the United States
ANTH 331: The Most Ancient Near East
ANTH 333: Roots of Ancient India: Archaeology of South Asia
ANTH 353: Chinese Culture and Society

At least two electives dealing with physical anthropology, such as
ANTH 302: Darwinian Medicine
ANTH 323: AIDS: Epidemiology, Biology, and Culture
ANTH/ANAT 375: Human Evolution: The Fossil Evidence
ANTH/ANAT 377: Human Osteology
ANTH 378: Reproductive Health: An Evolutionary Perspective
ANTH 396: Undergraduate Research in Evolutionary Biology

ENGINEERING CORE
A social science sequence for the B.S. based on the Engineering Core requires ANTH 102 or 103 and two other courses, one of which must be a 300-level course. ANTH 319 cannot be used to meet this requirement.

SAGES REQUIREMENTS
All SAGES requirements are set by the College of Arts and Sciences. This means that anthropology students are not required to complete their SAGES requirements with anthropology courses. If you do use anthropology courses to meet your SAGES requirements, however, these courses count towards the 30 credit major requirement.

Two categories of SAGES courses are offered by the department: SAGES Department Seminars and SAGES Capstone courses.

SAGES Department Seminars
Courses which meet this requirement include (but are not necessarily limited to):

ANTH 303  Darwinian Medicine
ANTH 316  Current Global Health Events
ANTH 347  Cultural Ecology: An Epistemological Approach to Environmental Sustainability
ANTH 349  Cultures of Latin America
ANTH 378  Reproductive Health: An Evolutionary Perspective
ANTH 382  Anthropological and Ecological Perspectives on Preserving and Restoring the Natural World

In order to determine which seminars are being offered each semester, enter ANTH under “Course Subject” and select SAGES Department Seminar under “Course List” in Schedule of Classes.

SAGES Capstone Courses
Your SAGES Capstone is generally either a research project or the exploration of a relevant topic under the direction of a faculty mentor. Once you have determined the topic of your Capstone, it is your responsibility to ask the appropriate faculty if they will be your mentor. If they agree, they will then give you permission to enroll in the Capstone course. The faculty mentor has the responsibility of defining the exact requirements for completing the Capstone. The Anthropology Department offers the following courses which satisfy the SAGES Capstone requirement:

ANTH 368  Evolutionary Biology Capstone. (Cross-list: BIOL 396, GEOL 396)
ANTH 398  Anthropology SAGES Capstone
ANTH 398C  Child Policy Externship and Capstone. (Cross-list: CHST 398C, PSCL 398C)

Guidelines for students completing the capstone requirement with ANTH 398 can be found at: http://anthropology.case.edu/undergraduate-programs/sages/

PLEASE READ THESE GUIDELINES CAREFULLY. Be aware that you must obtain the permission of the instructor in order to enroll in a Capstone course. Also, if you choose to perform field-based research, do not assume that you will be able to design a study, obtain the required permissions (both from the study site and from the Institutional Review Board), conduct the study and write and present the results in one semester. For that reason, students are encouraged to enroll in ANTH 399 (Independent Research) the semester prior to enrolling in ANTH 398. ANTH 399 is also by permission only so this will also have to be arranged with your faculty mentor well ahead of time.

UNDERGRADUATE ADVISORS
Undergraduate advisors sign students into the program, answer questions about requirements and courses, sign various forms, and certify completion of requirements for the major. The undergraduate advisors are listed below. A student may request any member of the department faculty to act in this capacity.

The following is a list of the undergraduate advisors for anthropology.

Dr. Katia Almeida ........................................... General and Medical Anthropology
Dr. Cynthia Beall .......................................................... Physical Anthropology
Dr. Lee Hoffer ................................................................. General and Medical Anthropology
Dr. Jim Shaffer ................................................................. Archaeology

SPECIAL PROGRAMS

ANTHROPOLOGY DEPARTMENT HONORS PROGRAM
This program is open to anthropology majors who have completed 15 hours of anthropology courses and successfully maintained a 3.25 grade point average in anthropology and a 3.0 grade point average overall.

The application process consists of arranging a research project with a faculty mentor, providing the faculty member with a transcript to verify the GPA requirements, and agreement on the project. Although an Anthropology SAGES Capstone can be a library research paper, the Honors Tutorial must be a research project. In addition, the Capstone and the Honors must be different projects.
The faculty mentor will give permission for students accepted into the Honors Program to register for ANTH 391 and ANTH 392 Honors Tutorial, typically in the spring of their junior year and the fall of their senior year.

The primary product of the Honors project is a research paper which will be made available for review by all anthropology faculty.

**ANTHROPOLOGICAL STUDENT ASSOCIATION (ASA)**

The Anthropological Student Association (ASA) is a group of undergraduate students who share not just an interest in anthropology, but an interest in salient issues of culture that we face in a globalized and interconnected world. To better learn and combat these issues they host weekly discussions of a particularly interesting topic, they give back a certain level of cultural competency to whomever may need it in the community and they host lecturers in the field who best display that which they value most. In addition, the group provides support for its members through peer advising and a sociable and open atmosphere.

**OHIO THETA CHAPTER OF LAMBDA ALPHA**

The Department of Anthropology is now the Ohio Theta Chapter of Lambda Alpha. Lambda Alpha is the international honors society for students of anthropology. Honors anthropology students are encouraged to join! The society provides funding for approved student activities, such as travel and professional conferences and seminars. The national chapter also publishes Lambda Alpha Journals, which appear annually and are internationally distributed. The Journal is committed to reserving 50% of its content for student work. Contact Dr. Lawrence Greksa, faculty sponsor and adviser for the group, for more information.

**JUNIOR YEAR ABROAD**

Full-time students who have earned a 3.0 grade point average at the college are eligible to apply for the Junior Year Abroad. Up to 30 semester hours of credit may be granted for study at an established foreign university or for foreign study programs offered through accredited American universities. Programs must be approved by the appropriate dean and the student’s major advisor. Details of the available programs may be obtained in the Office of Education Abroad in the Center for International Affairs in Tomlinson Hall, 368-2517 or studyabroad@case.edu.

**CERTIFICATE IN GLOBAL HEALTH**

The Certificate in Global Health was established as part of the Framework for Global Health Curricula, which is coordinated by the Center for Global Health and Diseases in the School of Medicine. The Certificate is intended to prepare students for continued involvement and potentially a career in global health.

The course requirements for anthropology majors are:
1) INTH 301: Fundamental Concepts in Global Health
2) ANTH 215: Introduction to Medical Anthropology
3) ANTH 359: Introduction to Global Health
4) One 300-level health-related elective approved by your advisor

For more information about the Certificate in Global Health, contact Professor Janet McGrath (jwm6@case.edu).

For more information on the Certificate, see: [http://www.case.edu/orgs/cghd/training/certificate.htm](http://www.case.edu/orgs/cghd/training/certificate.htm)

**EXPERIENTIAL LEARNING FELLOWSHIP IN ANTHROPOLOGY**

Experiential Learning Fellowships in Anthropology provide anthropology majors with the opportunity to have a meaningful experience in another culture, with the specific goal of enhancing your understanding of cultural, economic, political and social diversity. The fellowship is available to students with an interest in a project related in some way to business activities. Anthropology majors with an overall GPA of at least 3.0, who have obtained at least sophomore
status, and who have completed a minimum of 12 credits in anthropology, including ANTH 102, are eligible to apply for these funds.

More information on the fellowship can be found in the Undergraduate Programs section of our website: http://anthropology.case.edu/files/2016/07/Experiential-Fellowship-in-Anthropology-2016.pdf

INTERDISCIPLINARY PROGRAMS
There are several interdisciplinary programs that are often of interest to anthropology students. These include Asian Studies, Childhood Studies, Ethnic Studies, Evolutionary Biology, International Studies, and Women’s Studies.

For more information on these programs, see: https://artsmedia.case.edu/wp-content/uploads/sites/129/2017/08/01130700/Experiential-Fellowship-in-Anthropology-8-1-17.pdf

INTEGRATED GRADUATE STUDIES
The Integrated Graduate Studies (IGS) Program is intended for highly motivated undergraduate students who wish to complete the academic requirements of both a B.A. and M.A. degree in anthropology. The college requirements for the IGS program are described at: https://case.edu/ugstudies/programs-and-requirements/combined-graduate-and-professional-programs

Students must apply to the anthropology graduate program by the spring semester of their junior year. Details on applying to the graduate program can be found at http://anthropology.case.edu/graduate-programs/application-process/

It is possible to obtain the M.A. degree simultaneously with completion of the B.A. degree because courses taken during your senior year can be applied towards the completion of the requirements for both degrees. Course schedules must of course be constructed so that the courses taken during your senior year are appropriate for both degrees. The B.A. degree will be awarded upon meeting all requirements for a baccalaureate degree, which should occur by the end of your senior year. The M.A. degree will be awarded after successfully completing 30 graduate credit hours and 'passing' the comprehensive examination. For more details on the requirements for an M.A. in anthropology see: http://anthropology.case.edu/graduate-programs/requirements/master-arts-degree/
