EUROPEAN POLITICAL SYSTEMS

The purpose of this course is to explore the evolution and contemporary dynamics of political life in selected European political systems. The course will be organized around the themes of conflict and integration in modern society. It will focus on the developmental experiences of various European societies; their uniformity and diversity; and the mass political consequences of economic growth and stagnation, demographic and social change, and the emergence of new political forces and issues. Although theoretically-oriented in its approach, a substantial portion of the course will be devoted to a discussion of contemporary social, economic, and political trends in the European regional context.

The course assumes no previous student background in the subject matter; however, a certain familiarity with elementary political science concepts would be helpful. Students having difficulty with the concepts discussed in class are advised to consult with Jack Plano et al., *Dictionary of Political Analysis*, or Carl Beck, *Political Science Thesaurus II*. Background information on political parties can be found in V. McHale and S. Skowronski, *Political Parties of Europe*. These sources are available on-line and in the reference section of the Kelvin Smith Library. Also available are two British publications -- *Keesing’s Archives* (a compendium of events) and the *Financial Times* (daily newspaper) -- which are indispensable for day-to-day coverage of important political events in Europe. Students are also encouraged to explore the Internet for current European materials (e.g., the weekly *EU Observer*) and additional sources.

REQUIREMENTS:

There will be a midterm and a final examination. Both examinations will be primarily essay in nature, drawing largely on the lectures but also including the reading and research materials. The major exercise will be a team project. Depending on the issue, two to three students will be assigned to a specific issue related to one of the major topics on the syllabus. The team will research the issue in depth, prepare a briefing report, and conduct an oral seminar presentation on a designated date toward the end of the semester. Details regarding the team research assignment and seminar will be described in a separate handout. Regular class attendance and participation in class discussion are expected (see attached *Evaluation of Student Performance*). Attendance will be monitored. Since the lectures are largely independent of the reading, it will be most difficult for students to master the subject matter without regular class attendance. *Students with more than three (3) unexcused absences, or those with excessive class absences (7) will have their final course grade reduced by one letter grade.* The final course grade will be based on the following weighted distribution:
Class attendance and participation (10%)
Midterm examination (25%)
Research and oral presentation (40%)
Final examination (25%)

Consult the attached performance sheet for a more detailed explanation of grade evaluation.

Several handouts (calendars, notes, charts, graphs, etc.) will be distributed in class or may be sent via email attachments. Students are responsible for obtaining all class handouts even when absent from class.

ACADEMIC DISHONESTY:

Academic dishonesty (plagiarism, cheating on examinations, etc.) is a serious offense that can result in loss of credit, suspension, and possibly expulsion from the university. All suspected cases of academic dishonesty will be reported to the Dean of Undergraduate Studies.

OFFICE HOURS:

Students are encouraged to consult with the instructor regarding any problem they may be having in the course. This can be done through regular office hours (Monday and Wednesday, 3:00 - 3:50 p.m.) or by leaving telephone messages at 368-2425. Messages to the instructor can be sent via e-mail (user = "vem"). Appointments other than office hours must be confirmed with the instructor.

CELL PHONES AND COMPUTERS:

Please turn off cell phones before entering class. The class period is only 50 minutes. No texting; no tweeting. Note book and ebooks are permitted in class provided they do not disturb the other students.
IMPORTANT DATES:

A monthly calendar of lecture topics and other relevant information pertaining to the class will be provided to each student on a timely basis. Students will be notified of any changes in the class calendar.
