

June 1907

My dear Lord Rayleigh:-

Permit me to introduce myself; I feel that I am acquainted with you not only through my especial interest in your writings on sound, but also because I know of you through Prof. E. W. M., with whom I have been intimately acquainted associated in both <sup>life and</sup> work and social for the past 15 or 20 years. I was associated with him in the last exper on ether drift, and in many other experiments.

Since Prof. M. retired I have devoted myself to my personal <sup>own</sup> hobby which is sound and music.
