

44

Beginnings of a draft of a letter to Rayleigh from the 44 year old Miller, introducing himself.

June 1909

My dear Lord Rayleigh

Permit me to introduce myself. I feel that I am acquainted with you not only through my special interest in your writings on sound, but also because I know of you through Prof. E. W. M. with whom I have been intimately associated in both life and work for the past 15 to 20 years. I was associated with him in the last experiments on ether drift and in many other experiments.

Since Prof. M. retired I have devoted myself to my personal hobby which is sound and music.
