Chicago

Febr. 15 1911.

My dear Professor Miller:

The curves and the lantern slides were duly received in your order - and are certainly beautiful.

I regret to say the Analyzer is at present out of order - and I have no one I should care to trust to do the work required to make any thing like an accurate determination of the curves.

I think in any case your results are far more accurate than any one machine can furnish.

With kind regards

Sincerely yours  
A. Michelson
